Programming - Far/Near Reception

This feature provides the ability to set the reception sensitivity of each MYE Entertainment MWC2-8 receiver depending on the proximity between the receiver and transmitter.

Far Mode: (Default): The far mode is the most widely used and will accommodate the majority of installations.

Near Mode: The near mode is used primarily in situations where the receiver is positioned very close to one or more transmitters. The Near Mode is recommended when receivers are installed between 1 and 5 feet from a transmitter.

Far / Near Mode

Note: The factory default is set to "Far" (HI).

To change to "Near" mode (LO):

1. Start with the receiver in the OFF position.
2. With the unit OFF, press and hold the Volume UP button.
3. While holding the Volume UP button, press and release the POWER button.
4. Wait three seconds while continuing to hold the Volume UP button until 'LO' is appears on the display.
5. To revert back to Far mode simply follow steps 1-4 until "HI" appears on display.

Programming

The MYE Entertainment MWC2-8 receiver must be programmed to detect and lock in the MYE Entertainment transmitters or other brands of transmitters listed below. The receiver features both “auto” and “manual” program modes. In the auto mode the MWC2-8 will automatically search for and program in your transmitters. The manual mode provides the ability to add or erase a specific transmitter channel or unwanted frequency caused by spurious emissions or other local elements.

Auto Program Mode

1. Press Channel Down and Volume Up buttons simultaneously for three seconds until “P-1” appears on the display.
2. Press the “Ch Up ” button to select one of the following program modes:

P-1 = MYE Entertainment 800MHz Transmitters
P-2 = Cardio Theater / Enercise XTV Transmitters
P-3 = Audeon 800MHz Transmitters
3. After selecting the Transmitter Mode, press the TV button to auto-scan and lock transmitters.
4. Press the Channel Up or Channel Down buttons to determine all transmitters have been locked in. NOTE: “PRESET” will appear in the display when a transmitter channel is programmed.
5. To exit program mode press the EQ button. The display will blink briefly and then default to first transmitter channel programmed.

Manual Program Mode (Add or Delete Frequencies)

1. Press Channel Down and Volume UP buttons simultaneously for three seconds until “P-1” appears on the display.
2. Press the “Ch Up” button to select one of the following transmitter program modes listed above.
3. Press the EQ button
4. Press CHANNEL UP/DOWN buttons to scroll through all transmitter channels.
5. To add or delete a transmitter channel press the “TV” button. NOTE: “PRESET” will appear in the display when a transmitter channel is programmed.
6. To exit manual program mode press the EQ button. The display will blink briefly and will default to first transmitter channel programmed.

FM RADIO

Pressing the “FM” key switches the audio reception mode from 800MHz to FM. The FM Radio option is set to receive FM radio broadcasts from 87.5 to 107.9. Use the SCAN key to scan automatically up to next available FM channel. Use the channel UP / Down keys to move up / down one FM frequency at a time.

FM RADIO - Disable

The FM Radio function may be disabled (or enabled) by holding down the ‘FM’ button for three seconds at power up. The factory default for FM Radio is “enabled.”

1. Start with unit OFF. Press and hold the “FM” button.
2. Press power ON button. Wait 3 seconds. FM icon and FM arrow icon ‘▶’ are used to display FM radio mode status.
 - a. **Only the FM arrow icon ‘▶’** will display for 3 seconds when FM Radio “disable” has been selected. When the FM Radio mode has been disabled, the FM icon will no longer be visible during normal operation.

- b. The **FM icon and the FM arrow icon ‘▶’** are both displayed when FM Radio “enable” has been selected.

Other Features

Headphone Removal Monitoring

When the receiver detects that the headphones have been removed for more than ten seconds, it will automatically return the volume setting of the receiver to a nominal level.

Power Supply Monitoring

When the receiver detects low power input below 4.75vdc it will automatically power down to a stand-by (off) state.

Attaching the Receiver

The MWC2-8 receiver uses the Secure Grip Mounting Band. Mounting the receiver is now quick, secure and discrete. It is required that the Secure Grip Mounting Band always be used when installing MYE Entertainment MWC2-8 receivers.

Before you begin: Unscrew the MOUNTING BASE ASSEMBLY from the receiver by using the FRONT MOUNTING SCREWS. (See page 3 – Receiver Assembly Front View.)

Wrap the Secure Grip Band around the intended mounting pole and cut to fit. Do not overlap ends or have a gap over 1/8". Secure the Grip Band with 1 MYE Entertainment nylon tie in the center channel. OFFSET the knuckle of the nylon tie from center by approximately 1/4". Trim the excess nylon tie

Install the Mounting Base over the nylon tie knuckle. Insert two MYE Entertainment nylon ties into the holes opposite the tie knuckle hole.

Seat the nylon ties into the corresponding channels of the Secure Grip Band.

Pull the nylon ties tight to align all 3 tie knuckles. Trim all excess nylon tie completely.

Position and install the Rear Flange onto the Mounting Base. Interlocking gears assure secure positioning regardless of the rotation.

Insert one end of the CSAFES* cable into the RJ45 jack on the back of the receiver assembly. MYE ENTERTAINMENT receivers can be powered by CSAFE ports on CSAFE compliant cardio equipment or MYE Entertainment 9 volt power supplies.

Route the CSAFE cable through the appropriate rubber cable blocks A, B or C depending on where you need the cable to exit the receiver flange.

Align and attach the receiver assembly to the Rear Flange using the Front Flange mounting screws.

*USE only MYE Entertainment CSAFE cables or 9 volt power supplies with all MYE Entertainment receivers (900MHz, 800MHz or FM). MYE Entertainment will not be responsible for damage to receivers or cardio equipment when alternate or other cables or power supplies are used.

IntelliJack - Self Diagnostic Headphone Jack

The IntelliJack self diagnostic headphone circuit detects when the headphone jack has failed or been damaged. When a faulty headphone jack is detected, a flashing “headphone” icon appears in the LCD display. It will remain on until a new jack is installed and the icon reset.

To Replace the Intellijack:

1. Loosen the two screws evenly on the bottom of the IntelliJack module and remove.
2. Carefully insert new IntelliJack module without bending contact pins.
3. Reset the Icon. Turn MYE Entertainment receiver OFF then press and hold the “Power” button for 3-4 seconds. When the “headphone” icon appears again release the Power button.

IMPORTANT NOTICE: Faulty headphones can trigger the faulty headphone jack icon. It is important to test the headphone jack prior to replacement. If the headphone jack is deemed OK simply follow step #3 above to reset the faulty headphone jack.
